

Quality and Environmental Policy

iCOM Works Limited is fully committed to the continuous improvement of the quality of the business and increasing customer awareness and satisfaction, as well as the continuous improvement of their environmental impacts. This will be achieved through evaluation of all potential risks and opportunities relating to business processes and their impact on interested stakeholders, measurement of success against defined objectives, and compliance to all statutory and regulatory requirements. This includes the evaluation of environmental aspects, and the implementation of environmental improvement programs, and the measurement of defined objectives and prevent pollution. The assessment of risks and opportunities provides a platform for the setting of objectives and improvement plans. The undertaking of a formal review process and the communication of this policy and its associated objectives to all interested parties provides a platform for continuous improvement. The signing of this policy by senior management is seen as a commitment to the implementation of an all-encompassing integrated quality and environmental management system.
